PROFESSIONAL EXPERIENCE

Web Developer

March 2025 - present

Lumel Technologies, Chennai

- Developed and maintained scalable frontend applications using Next.js, React.js, and TypeScript, delivering responsive, cross-browser compatible user interfaces with high performance.
- Built reusable UI components and integrated REST and GraphQL APIs using Strapi CMS, troubleshooting frontend integration issues and enabling seamless frontend-backend communication.
- Developed reusable frontend packages published through GitHub Packages, improving code reusability, maintainability, and consistency across multiple projects.
- Collaborated with designers, marketers, and developers using Git and GitHub to build reusable frontend components, resolve UI issues, and deliver production-ready features.

Product Developer Intern

Sept 2024- Feb 2025

Lumel Technologies, Chennai

- Contributed to ValQ, a business modeling and decision intelligence product for Microsoft Power BI, enabling advanced simulation and scenario analysis.
- Developed and optimized interactive user interfaces using React.js and TypeScript, improving component performance and enhancing user experience.
- Collaborated with the engineering team to build reusable frontend components while ensuring seamless integration, scalability, and compatibility across xViz and Inforiver BI products.

PROJECTS

CR7 Menswear | [Live Demo](#)

Technologies Used: React.js, Vite, JavaScript, Tailwind CSS, Firebase Firestore, Cloudinary, Vercel Serverless Functions, REST APIs

- Built and deployed a production-ready e-commerce platform and admin dashboard for a retail clothing business, implementing responsive UI, product management, category filtering, and inventory workflows.
- Developed secure serverless APIs on Vercel for dynamic OpenGraph metadata generation and automated Cloudinary image deletion, improving social media link previews and media management.
- Implemented Firebase Firestore with role-based access control (RBAC), reusable React hooks, SEO optimization using structured data, and performance-focused frontend architecture for a scalable user experience.

CODESENSEI | [Live Demo](#) | [GitHub](#)

Technologies Used: Next.js, React.js, TypeScript, Supabase, Vapi, Clerk Auth, Sentry, Tailwind CSS, ShadCN UI

- Built a real-time AI-powered voice learning assistant using Next.js, React.js, and TypeScript to explain computer science concepts such as DSA, OS, and DBMS through conversational AI powered by Vapi and OpenAI.
- Integrated Clerk for secure authentication, Supabase for database and storage, and Sentry for real-time error monitoring to ensure a scalable, production-ready experience.
- Designed a clean, responsive UI using Tailwind CSS and ShadCN UI, enabling users to search, filter, and interact naturally through voice or text.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, ShadCN UI

Backend: Node.js, Express.js, Koa.js, Strapi CMS, MySQL, PostgreSQL, REST APIs, GraphQL, Supabase

Tools & Platforms: Git, GitHub, Postman, VS Code, Cursor AI, Claude AI, GitHub Copilot, IntelliJ IDEA, Power BI

EDUCATION

Bishop Heber College

Bachelor of Science in Computer Science

2021-2024

CGPA: 8.7
