EDUCATION

Bishop Heber College

Bachelor of Science in Computer Science

2021-2024

CGPA: 8.7

Relevant Coursework:

Software Engineering, Data Structures & Algorithms, Object-Oriented Programming (OOP), Web Engineering, Database Management Systems, Operating Systems, Computer Networks, Machine Learning.

PROFESSIONAL EXPERIENCE

Web Developer

Lumel Technologies, Chennai

March 2025 - present

- Developed and maintained scalable frontend applications using Next.js, React.js, and TypeScript, ensuring high performance and responsiveness across devices.
- Built and structured backend content models using Strapi.js (Headless CMS) and integrated REST APIs to dynamically render content on the frontend.
- Created and published a custom internal npm package, standardizing shared code and accelerating deployment across multiple projects.
- Collaborated with cross-functional teams, including marketing, design, and content, to deliver user-centric features and ensure seamless UI/UX integration aligned with business goals.

Product Developer Intern

Lumel Technologies, Chennai

Sept 2024- Feb 2025

- Contributed to the development of ValQ, an advanced decision-making product in Microsoft Power BI, supporting business modelling and scenario simulations.
- Built and optimized interactive frontend interfaces using React.js and TypeScript, enhancing performance and improving user experience.
- Gained practical experience with BI tools like xViz and Inforiver, focusing on seamless integration, scalability, and compatibility across environments.

PROJECTS

CODESENSEI | [Link](#)

Tech Stack: Next.js, React.js, TypeScript, Supabase, Vapi, Clerk Auth, Sentry, Tailwind CSS, ShadCN UI

- Built a real-time, voice-enabled learning assistant that explains computer science concepts like DSA, OS, DBMS, and more using conversational AI powered by Vapi and OpenAI.
- Integrated Clerk for secure authentication, Supabase for database and storage, and Sentry for real-time error monitoring to ensure a scalable, production-ready experience.
- Designed a clean, responsive UI using Tailwind CSS and ShadCN, allowing users to search topics, filter by subject, and interact naturally through voice or text.

Internal CMS Collaboration Platform | [Link](#)

Tech Stack: React.js, Next.js, TypeScript, Strapi (Headless CMS), REST API, GraphQL

- Built a proof-of-concept web platform to streamline collaboration between engineering and marketing teams, enabling dynamic content updates via Strapi CMS.
- Integrated REST and GraphQL APIs to render real-time, editable content, empowering non-technical teams to manage pages without developer involvement.
- Engineered a reusable internal npm package as a plugin for Strapi and Next.js, improving modularity, reducing code duplication, and accelerating future development cycles.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, PHP, SQL

Frontend: HTML, CSS, React.js, Next.js, Tailwind CSS, Shadcn UI

Backend: Node.js, Express.js, Strapi.js (Headless CMS), MySQL, Rest API, GraphQL

Tools & Platforms: GitHub, Visual Studio Code, IntelliJ IDEA, WordPress, Power BI, Postman
