EDUCATION

Bishop Heber College

Bachelor of Science in Computer Science

2021-2024

CGPA: 8.7

Relevant Coursework:

Software Engineering, Data Structures & Algorithms, Object-Oriented Programming, Web Engineering, Database Management Systems, Operating Systems, Computer Networks, Machine Learning

PROFESSIONAL EXPERIENCE

Web Developer

March 2025 - present

Lumel Technologies, Chennai

- Developed and maintained scalable frontend applications using Next.js, React.js, and TypeScript, ensuring high performance and responsiveness across devices.
- Built backend architecture and plugins in Strapi (Koa.js) with REST and GraphQL APIs for dynamic content delivery.
- Implemented a micro-frontend architecture with modular packages published via GitHub Packages, enabling seamless multi-repo integration.
- Collaborated with marketing and design teams on website updates, UI/UX enhancements and Azure deployments.

Product Developer Intern

Sept 2024- Feb 2025

Lumel Technologies, Chennai

- Contributed to ValQ, a business modeling and decision intelligence product built for Microsoft Power BI, enabling advanced simulation and scenario analysis.
- Developed and optimized interactive front-end interfaces using React.js and TypeScript, improving component performance and user engagement.
- Worked with xViz and Inforiver BI tools, focusing on seamless integration, scalability, and compatibility across environments.

PROJECTS

CODESENSEI | [Link](#)

Tech Stack: Next.js, React.js, TypeScript, Supabase, Vapi, Clerk Auth, Sentry, Tailwind CSS, ShadCN UI

- Built a real-time, voice-enabled learning assistant that explains computer science concepts like DSA, OS, DBMS, and more using conversational AI powered by Vapi and OpenAI.
- Integrated Clerk for secure authentication, Supabase for database and storage, and Sentry for real-time error monitoring to ensure a scalable, production-ready experience.
- Designed a clean, responsive UI using Tailwind CSS and Shadcn UI, allowing users to search, filter, and interact naturally through voice or text.

Internal CMS Collaboration Platform | [Link](#)

Tech Stack: React.js, Next.js, TypeScript, Strapi (Headless CMS), REST API, GraphQL

- Developed a collaboration platform connecting engineering and marketing teams, enabling real-time content management via **Strapi CMS** with enhanced SEO and optimized builds.
- Integrated REST and GraphQL APIs to deliver dynamic, editable content while optimizing code structure, bundle size, and overall application performance.
- Built a reusable internal package for Strapi and Next.js, improving modularity, reducing code duplication, and enabling faster, scalable deployments across multiple projects.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, PHP, SQL

Frontend: HTML, CSS, React.js, Next.js, Tailwind CSS, Shadcn UI

Backend: Node.js, Express.js, Strapi (Headless CMS), MySQL, PostgreSQL, REST API, GraphQL

Tools & Platforms: Git, GitHub, Visual Studio Code, IntelliJ IDEA, Postman, WordPress, Power BIs
